

Hagmans Radiator Paint

Product description:

Hagmans Radiator Paint is a quick-drying, dry, almost odorless spray paint with high coverage. The product is heat resistant up to 80 ° C

Area of use:

Used for classic radiators etc.

Technical information:

Base: Acrylic

Gloss: Semigloss

Color: White, Ral 9016

Drying time at 20 ° C:

Dust dry about 85 min.

Genomtorr approx. 24 hrs.

Content: 400 ml

Preparation:

The substrate must be firm, clean and dry. Clean the surface thoroughly (remove rust) and grind lightly, bare metal must be primed. Spray only on cold elements at room temperature.

Use / Application:

Shake the can for at least 2 min. after the balls start to rustle before the paintwork begins. Always do a test spray to check the hue. Spray thin 2-3 times with a spraying distance of about 15 cm, wait about 30-45 sec. between times. Paint at normal room temperature, ensure good ventilation. Turn the can and spray the valve empty after use.
