

Hagmans Heat paint, black

Product description:

Hagmans Värmefärg (heat paint) is a matt, heat-resistant paint which resists heat up to 650 °C.

Teknical information:

Base material: Silicone resin
Flash point: -10 °C
Fire class: 1
Drying time: Approx. 30 minutes
Shelf-life: 1 year

Preparation:

Surfaces to be treated must be completely clean. Remove any rust and grind first.

Directions for Use / Application:

Shake the can for at least 2 minutes after the balls begin to clatter before applying the lacquer. Test spray and check the colour. Only spray a thin layer without priming at a spraying distance of approx. 25 cm. Let

the lacquered surface dry for about 30 minutes. Then heat the surface slowly to + 250 °C. After this time the lacquer is thoroughly hardened. Lacquer at normal room temperature and with good ventilation. Reverse the can after use and spray until the valve is empty.

Note: Do not spray towards open flames of hot objects.

Any splashes must be immediately removed with acetone or cellulose naphtha.

Packaging:

Article number:
11497 Spray can 6 x 400 ml

Colour:

Black
