

Hagmans Super Wash Ceramic

Product Description:

Hagmans Super Wash Ceramic - Car shampoo with ceramic additives. Super wash Ceramic has a degreasing effect and good washing ability that gives a clean varnish but also the ceramic additives that give shine and good runoff that lasts a long time.

Area of use:

For exterior cleaning of all varnished surfaces, plastic parts and glass on e.g. cars, motorcycle, truck, bus, motorhome, caravan, trailer, boat, etc.

A powerful detergent that combines:

- Degreasing - Road dirt, salt and minor asphalt stains are dissolved.
- Shampoo - Washes clean and gives shine.
- Ceramic additives - Protects and provides better drainage and gives a lovely pearl effect on the water.

Superwash Ceramic can be used both on an untreated car that has not received any wax to easily achieve the same effect as a waxed car. As well as maintenance on a waxed or varnish treated car to maintain or revive the wax layer and give the varnish a new protective gloss layer.

Technical information:

Application temperature: from about + 1°C up to + 25°C.

Material-consumption: 1 bottle - 500 ml, enough for about 5 cars (ex Volvo V60).

Dilution: Not diluted. Apply directly to the sponge

Shelf life: At least 2 years

Instructions of use:

- Before washing the car, make sure you are in a intended area.
- Make sure the car is free of gravel, stones and other rough particles that can scratch the varnish. Rinse the car, preferably with high-pressure washer.
- Fill a bucket with about 10 liters of lukewarm water.
- Soak a car wash sponge and pour Hagman's Super Wash Ceramic directly onto the sponge.
- Wash the car with the sponge. Start with the cleanest parts. roof, hood, etc. and work your way down. Rinse the sponge regularly in the bucket and then apply a new Hagmans Super Wash Ceramic.
- After washing the entire car, rinse it with clean water.

Hagmans Super Wash Ceramic

Tip:

In order not to get marks of water drops on the varnish and windows, wipe the car with Hagman's wiping cloth. It leaves no streaks or stains. If you want extra good drainage and gloss, its recommended to apply Hagmans Spray Wax Ceramic after you are don washing the car with Hagmans Super Wash Ceramic.

If you have more difficult spots(asphalt or bugs) that you want to get rid of, try products from Hagman's other product range, for example. Power degreasing, Insect Remover.

Other:

We recommend that in order to avoid a patchy result, do not wash the car in direct sunshine and do not let the shampoo dry on the paint. Hagman's Super Wash Ceramic gives even better shine if the car is well polished.

At Hagmans you will find a complete program of polishing and varnish protection products. For other car care products from Hagmans visit our website: www.hagmans.se
