

Hagmans Wheel Clean

TECHNICAL PRODUCT DATA SHEET

2019-05-16

Page 1/1

Product description:

Hagmans Wheel Cleaning quickly and efficiently solves dirt, fly rust and brake dust from the car's wheels and other heavily soiled parts. Acid-based product. Note! Use only on coated rims.

Application area: Spray on the car's rims to dissolve brake dust, road dirt and grease residues more quickly. The product is acid-based and your brake discs can oxidize on the surface but it disappears immediately when you drive the car. Gentle on plastic, rubber and varnish. Tough against dirt. The acid in the Wheel Cleaning can discolour polished or other untreated surfaces. If you are unsure about the surface of the rim, check it before using Wheel Cleaning or try on a non-visible surface. Also, be careful on surfaces painted with one-component paint, the acid can be aggressive to the paint. The majority of rims are painted with two-component colour and then Hagmans Wheel cleaning works very efficiently.

Technical information:

Application temperature: From about + 1 ° C up to + 30 ° C.

Material consumption: 1 bottle - 500 ml, enough for about 8 wheels.

Dilution: Use solution, do not dilute.

Shelf life: At least 2 years.

Base material: Surfactants.

Instructions for use: Before washing the car, make sure that you are in a designated place. Spray abundantly with Hagmans Wheel cleaning on a dry rim so that the dirt sucks up the agent. Remember not to allow the agent to dry. Not used on hot rims or in bright sunshine. Then rinse off the rim with high pressure washer. Clean one rim at a time until all the car's wheels are clean. If the dirt is heavily ingrained, repeat the treatment and use the field cleaning brush to process the dirt. Hard asphalt spots can be solved most easily with Hagmans Tar Remover. To get a nice result, finish by treating the wheels with Hagmans Tires & Rim Shine.

Other: Hagmans Wheel clean provides even faster cleaning if the rim is well polished, At Hagmans you will find a complete program with polishing and varnish protection products. For other car care products from Hagmans visit our website: hagmans.se
