

Hagmans Spray Wax Ceramic

Product Description:

Hagmans Spray Wax Ceramic – Ceramic protection in spray form that is easily applied and provides an outstandingly good drainage and glossy paint that lasts for a long time.

Area of use:

To provide excellent drainage and gloss on all varnished surfaces, for example car, motorcycle, truck, bus, motorhome, caravan, trailer, boat, etc. Hagman's Spray Wax Ceramic can be used on an untreated car that has not received any wax to easily achieve a wax effect. The best effect are obtained by using it on a waxed or varnish treated car to maintain or revive the wax layer and give the varnish a new protective gloss layer.

A powerful wax with ceramic additives such as:

- Protects and gives shine to the varnish.
- Provides good drainage with lovely pearl effect on the water.

Technical information:

Application temperature: from about + 1°C up to + 25°C.

Material-consumption: 1 bottle - 500 ml, enough for about 8 cars (ex Volvo V60)

Dilution: Not diluted. Apply directly to wet car with the spray nozzle.

Shelf life: At least 2 years, Store protected from frost.

Instructions of use:

Step one:

- Before washing the car, make sure you are in a intended area.
- Make sure the car is free of gravel, stones and other rough particles that can scratch the varnish. Rinse the car, preferably with high-pressure washer.
- Wash your car with Hagman's Foam Shampoo Ceramic and work from the top down. Start with the cleanest parts, roof, hood, etc. Rinse the sponge regularly in the bucket.
- After washing the entire car, rinse it with clean water.

Step two:

- Spray Hagmans Spray Wax Ceramic on wet surface, one small area at a time. Start with just the roof, then the hood, etc. The product is very lasting and you only need 3-4 spray on the whole hood for example.
- For best effect, you can sponge out the agent before proceeding but it is not required. Spray Wax Ceramic does not have to react to the surface, so you can go to the next step directly.
- Rinse the surface with the water hose.
- Proceed with the next area on the car.
- Finish with rinse the whole car and wipe the car with Hagman's Drying towel blue.

Tip:

Do not allow Hagman's Spray Wax Ceramic to dry, always rinse the surface with the hose. In order not to get marks of water drops on the varnish and windows, wipe the car with Hagman's Drying towel blue. It leaves no streaks or stains. Should the product dry in, the marks are best polished off with Hagman's Wax polish or Hagmans Snabbtvätt. To avoid the problem of the towel becoming water repellent after use, soak the cloth immediately after you wipe the car. Rinse the cloth before drying.

Other:

We recommend that you do not wash the car in direct sunshine or when it is hot and do not let the Spray Wax dry on the paint.

At Hagmans you will find a complete program of polishing and varnish protection products. For other car care products from Hagmans visit our website: www.hagmans.se
