

Gräsklippartvätt

Product Description / Application:

Effectively softens old grass. Used advantageously for cleaning most garden and agricultural implements such as robotic lawnmowers, lawn mowers, trimmers etc.

Technical information:

Base material: surfactants

PH: about 13

Density: 1.025

Material consumption: Approx. 2 m² / L

Shelf life: When stored at room temperature; 5 years

Preparation:

Remove loose sitting grass with a brush / brush.

Use / Application:

Set the item to be cleaned on a straight edge. Spray with plenty of detergent to get the surface wet, leave for 5-10 minutes. Then rinse clean with water. On machines that must not be rinsed with water-type robotic lawnmowers, the grass should be removed with a brush / brush and then wiped dry with a cloth. Repeat treatment if necessary. Other information: Wear rubber gloves and goggles when using the product.

packaging: 1 L with pump
