

Brush Cleaner

Product Description:

Hagmans Brush Cleaner is an effective cleaning agent for all types of painting tools after painting.

The product is a biologically easily degradable solution that dissolves both water-based and alkyd-based paints.

TECHNICAL DATA:

Binder	Surfactants / alkali
Density	1,01

Instructions for use:

Use undiluted brush cleaner. Clean tools immediately after use. First, remove as much paint as possible from the tools.

Then place/place brushes and tools in Hagman's Brush Wash until the paint dissolves and then rinse with water.

Dried paint can be dissolved by leaving the brushes in Hagman's Brush Wash for a day. In more severe cases, treatment with a steel brush may also be required. Avoid aluminum surfaces.

Other information: Liquid residues must not be poured into the drain. Leave paint residues, packaging and washing-up liquid from cleaning tools at your local environmental station. Keep out of the reach of children.
