

Asfaltkitt

Product Description:

Stopping based on soft special asphalt, fibres and filler material. Will even adhere to moist surfaces.

Range of Applications:

Cracks in sheet metal joints where roofing felt has been laid on top of joints in sheet metal. Sheet metal joints and cracks around chimney flashing, sleeve couplings, domes and roof hatches. Joints in roofing felt, as well as vertically-seamed sheet metal roofs.

Technical Data:

Density: 1.30
Dry content: Approx. 80%
Drying time at +15°C: 1mm/24 hours coating.
Fire-hazard: Flammable. Firehazard class 2b
Shelf-life: 2 years

Preparation:

Remove any dirt, rust and loose particles from the substrate by scraping and brushing. Prime sheet metal surfaces using Hagmans Grip On Primer, and other surfaces using Hagmans Asfaltprimer.

Directions for Use:

Apply Hagmans Asfaltkitt using, for example, a steel putty knife.
Use cloth to reinforce cracks caused by movement and large holes, and cover with a new layer of stopping.

Packaging:

Article number:
55002 12 x 310 ml (cartridge)
55001 1 kg
55003 6 kg
55005 20 kg
