

Asfaltprimer

Product description:

Cold asphalt designed for grounding and damp-proofing.

Range of application:

Designed for dehydrated felt-roofs, before coating with Hagmans Takmassa. To be used also for damp-proofing of foundation walls.

Technical information:

Density: 0,89
Dry content: 50 %
Drying time: at +20* 2 hours
Inflammability: inflammable, fire class 2b
Flash-point: +36°C
Storage time: 2 years
Colour: black

Preparation:

Scrape and brush the surface clean from dirt, rust and loose particles, if any. If necessary, dry the surface. Found plated surfaces with Hagmans Sheet metal Primer.

Directions for usage:

The surface should be clean and dry.
Apply the asphalt-primer with a brush or a roller.
